

Explain the following questions in two simple sentences

1. What is the use of the git add command?
It is used to add files to staging area so that it is ready to be committed.
2. Write the command to create a branch "feature-group".
git branch feature-group
3. What is a pull request? Write the steps involved in creating a pull request.
Pull request is proposal of some changes to someone else's repository which they can review & then approve/reject.
To create a Pull request -
 - Create a fork
 - Create a new branch & push your changes to your fork
 - Open Github, go to Pull requests tab of the original repository
 - Click on new Pull request and select your fork branch
 - Click create
4. How do you add collaborators?
 - Open settings -> Collaborators
 - Verify 2FA if required
 - Click add people under Manage access section
 - Select github user & click Add
5. What is the command used to commit our changes in github repo?
git commit -m "commit by Omkar"
6. Create a github account and repository to save all your assignment tasks. Example repository name: rg-assignments
Repository - <https://github.com/OmkarPh/rg-assignments/>
7. Create a branch called feature-java(you can use it later to push all your java related tasks to this branch)
Branch - <https://github.com/OmkarPh/rg-assignments/tree/feature-java>

8. Install IntelliJ IDE. Create a simple java project displaying “Hello World!!”and share the screenshot

9. In IntelliJ IDE, explore the shortcut keys for the following
- To run the project - **Ctrl + R**
 - To select a line - **Cmd+C** copies the line & extends selection to entire line
 - To comment/uncomment a line - **Cmd + /**
 - To delete a line - **Cmd + Delete**
